Achieve a Natural Woodgrain Look with Knotwood.

Knotwood is designed to replicate the natural look of wood with realistic woodgrain variations. Our cladding boards feature a variety of woodgrain patterns, which may vary due to the repetition of the film used during the sublimation process.

Example Variation.

To better showcase the correct installation method and help create a natural woodgrain look, we have provided examples of woodgrain patterns.

Example Variation 1

Example Variation 3

Example Variation 4

Disclaimer: Boards are not numbered, and the number of woodgrain variations may vary. Variation numbers in this document are for explanation only. It is the installer's responsibility to assess board patterns during installation.

Installation.

To achieve the most authentic appearance during installation, it is essential to identify these variations and mix the sequence of boards.

Please Avoid.

Avoid repetitive patterns as much as possible, as we cannot guarantee the same woodgrain placement if additional stock is required later.
